Quick Reference Action Response Plan

Acute Dust _{PM-10} Action Level	Action/Procedure
$\geq 109 \text{ ug/m}^3 + \text{Background}$ (duration of less than 5 minutes)	<ul style="list-style-type: none"> • The PAMPT will observe PM-10 concentrations at the location of the exceedance. Make notification to SHSO. The PAMT and SHSO will attempt to identify the source of the PM-10 emissions. The SHSO will make preparations to address the source. • Continue to observe PM-10 emissions.
$\geq 109 \text{ ug/m}^3 + \text{Background}$ (duration of more than 5 minutes)	<ul style="list-style-type: none"> • Document the time and PM-10 level within the air monitoring log or field log book. Prepare to collect confirmatory sample. • Implement use of engineering control measures if PM is sustained above 109 ug/m^3 for more than 5 minutes. • Continue to observe PM-10 emissions.
$\geq 109 \text{ ug/m}^3 + \text{Background}$ (duration of more than 15 minutes)	<ul style="list-style-type: none"> • Cease intrusive activities. Document the time and PM-10 level within the air monitoring log or field log book. • Collect confirmatory sample. • Re-evaluate work procedures and amend as appropriate. Continue monitoring and engineering control measures. • When PM-10 concentration falls below the Action Level (15 minute TWA), work may resume.
Visible dust	<ul style="list-style-type: none"> • Implement dust suppression measures (discretion of the PAMT).
